ABOUT.html

```

<html>
    <head>

    </head>

    <body background="static/image/slide2.jpeg" >
        <br>
        <br>
        <h1><center>Purpose of Personal Expense Tracker</center></h1>
        <br><br>

```

```

    <p><center><italic>
        <center>Tracking your spending is often the first step in getting
your finances in order. By understanding what you spend money on and how much
you spend, you can see exactly where your cash is going and areas where you
can cut back.</center><br>

        <center>It's easy to make this part of your everyday routine
thanks to expense tracker apps that help you manage your money on the go.
These apps certainly overlap with budgeting apps, but while the latter
provides a big-picture view of your finances, expense tracker apps put more of
an emphasis on your spending. These apps usually categorize your expenses and
help you get a good idea of your purchasing behavior.</center><br>

        <center>Whether you want an expense tracker app that easily
captures all your transaction data, one that automates the expense reporting
process at your job or one that holds you accountable by requiring you to
manually input each one of your transactions, there's an app out there for
you.</center><br>

    </italic></center></p>
    <p><center><italic> <h3>
        In simple words, personal finance entails all the financial decisions
and activities that a Finance app makes your life
        easier by helping you to manage your finances efficiently. A personal
finance app will not only help you with budgeting and
        accounting but also give you helpful insights about money
management. Personal finance applications will ask users to add
        their expenses and based on their expenses wallet balance will be
updated which will be visible to the user.
        Also, users can get an analysis of their expenditure in graphical
forms. They have an option to set a limit for the amount
        to be used for that particular month if the limit is exceeded the user
will be notified with an email alert.
